

# How much contents cover should I have for my stuff?

It's easy to underestimate how much contents insurance you need and if the worst should happen, you want to make sure you're covered.

Think about it like this, if you were to tip your house upside down, anything that falls out is considered contents.

Contents is things like your sofa, tv, watches, jewellery, carpets, clothing and more - don't forget the items in your garages and outbuildings too!

Need further help? Check out our handy contents calculator.
