

Top reasons to work with LV= General Insurance

As one of the UK's largest insurers, we've used our 175 years of experience to craft our Home insurance policies to perfection. All to make sure we can have your back, whilst you have your clients.

We know insurance is about more than just helping your clients feel protected. It's also about building trust, service and letting them know we'll be there for them if the time comes.

With a combination of our dedicated team, technical capability and our new and improved products, there's lots of reasons why you should choose us. But to help you make that decision, we've collated **our top reasons why you and your client should say 'yes' to LV= GI.**

Quick application process

With our quick 5 question application process, you can ensure that your client's homes are covered and in good hands.

Time to think

Quotes last 180 days, giving them the time to ponder our protection.

12 months at 0% interest

Your clients can spread the cost of your cover over 12 months at 0% interest, making life a little easier.

Sprung a leak?

We offer up to £5,000 trace and access cover for Gold insurance and £10,000 with Platinum cover as standard on our policies.

A helping hand

To help reduce some of the stress of moving, we'll give them 90 days buildings cover from exchange to completion.

Ready for the unexpected

With up to £1000 home emergency cover as standard, they're protected with both Gold and Platinum cover.

Non disclosure risk

Clients no longer have to answer a lot of complex questions – which reduces the risk of non-disclosure, giving you greater peace of mind and potentially fewer claims declined.

Multicover discount

We'll automatically apply a multi-policy discount to your client's policy if they have an existing LV= Motor, Landlord or Home insurance policy in place.*

Guaranteed Quote

The quote we give your client is guaranteed, providing they can agree to our usual assumptions.

Discover more at lvgi-intermediaries.co.uk

*The discount will not be applied automatically on a home policy if the risk address does not match the correspondence address on their existing LV policy.
